DETAILED ACTION

1. Claim 1, 2, 7, 8, 9 and 14 are allowable. Claims 3-5 and 10-12 previously withdrawn from consideration as a result of a restriction requirement, requires all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions species 1-4, as set forth in the Office action mailed on 03/08/2004, is hereby withdrawn** and claims 3-5 and 10-12 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim(s) including all the limitations of an allowable claim is presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01. Therefore claims 1-5, 7-12 and 14 are allowed.

values for each pixel train in the vertical direction to produce a data array in the horizontal direction for each of said plurality of images; misregistration amount detecting means for detecting the amounts of misregistration of respective images except for a reference image using feature points of images, said reference image selected from said plurality of images, with respect to said reference image... wherein said feature point extracting means extracts feature points in said reference image and feature points in each of the images except for said reference image based on the respective data arrays in the vertical and horizontal directions.

[Claim 8]: This claims is a method claim used in an imaging apparatus claim corresponding to claim 1.
